

Welcome to our celebration assembly!

FEBRUARY 28TH 2025

Sunflowers

This week, we had a workshop with HSBC. They us all about how to budget so we could plan a party!

Mrs Clifford showed us how to respond to music with movement!

Poppies

We're collecting
'wow' work, showing
super effort and
enthusiasm for
learning in our class!

We are going to fill
our display this term!

We work with so much independence in our planning time.

This week, we enjoyed looking for specific landmarks on Google Earth, following instructions and exploring different ways of making lines.

Bluebells

This week we wanted to show all the things we have learned about the artist Mackintosh. We presented this with pictures, facts and information about him and his work. We included our own Mackintosh artwork too!

Pines

The Blossoms are really enjoying learning the key skills involved in playing basketball. They are working hard on the different types of passes.

Blossoms

In maths, we have
been working hard
to partition
numbers, using
counters and dienes,
to help us add.

Oaks

This week, we have been inspired by the artist Julian Opie. We created portraits of either ourselves or our family in his style using pens.

Willows

In science, we have
been looking at
classification.

We explored
habitats, appearance
and eating habits to
identify similarities
and differences.

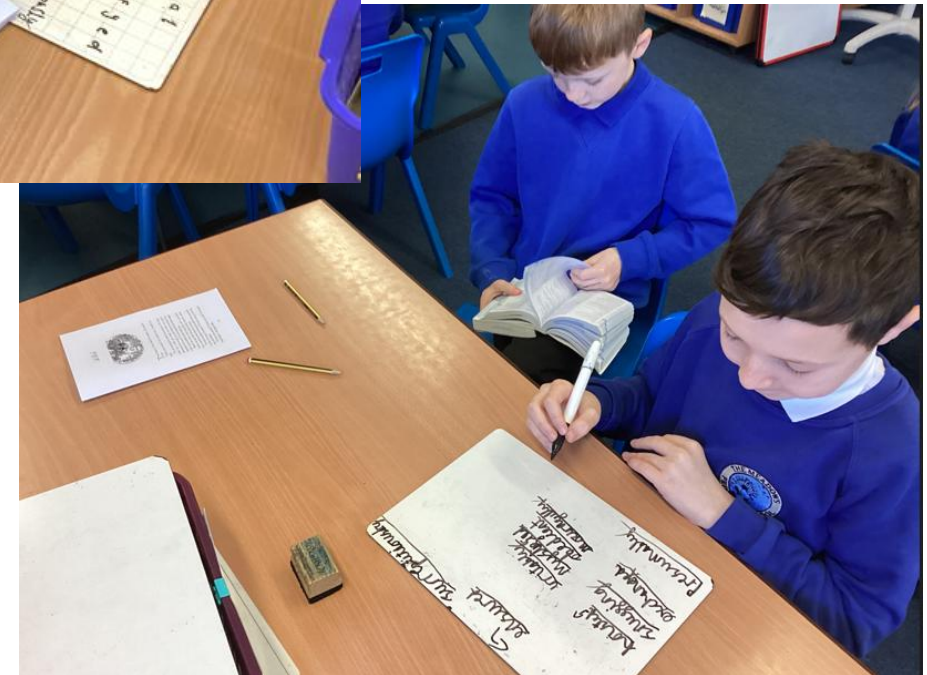

Sycamores

This week, we had a challenge to find the most unusual vocabulary in our text and find their definitions.

We found some amazing words, including surreptitiously!

Hedgehogs

Bunnies

In science this week,
we have been
investigating day and
night on Earth.

We had a fantastic visit from an environmental expert within our local council.

We discovered interesting facts and information about climate change and have been set with an exciting project to design select buildings in Lincoln.

Goats

Chipmunks

We loved our
dodgeball
lessons.

It was great to
apply our skills
in competitive
games!

Well done,
everyone!

Together, we
make a great
team!
