

Welcome to our celebration assembly!

MARCH 14TH 2025

We enjoyed meeting a local travel agent who set us a challenge to create leaflets advertising different countries to give to his customers!

Sunflowers

We have been working hard to recognise rhyming words as part of our reading in the Poppies class.

Poppies

Bluebells

We enjoyed learning about pitch with our music specialist this week!

We have had a great science week!

We had live assemblies, the chance to watch seeds germinate and we designed posters for a competition.

We also measured the height of everyone in the class and worked out the average height of the children in the Pines.

Pines

This week in the Blossoms, we enjoyed our British Science Week activities!

We loved the minibeast hunt and our plant growing experiment!

Blossoms

We loved our
British Science
Week activities,
especially the
minibeast hunt and
creating a collage
with natural
materials.

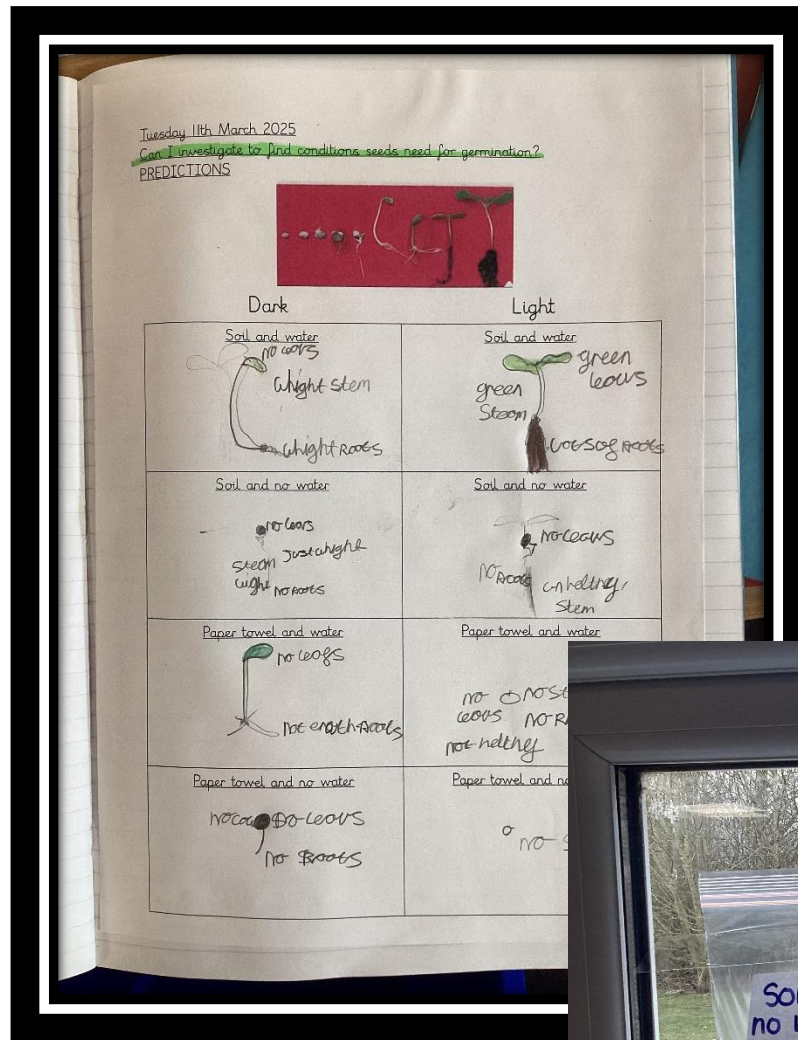

Oaks

As part of British Science Week, we have set up an experiment to test what plants need to grow.

We enjoyed making predictions of what we think the seeds will do.

Willows

We loved our
orienteering session
and creating art
using natural
resources for British
Science Week!

Sycamores

On our science day
this week, we used a
sponging technique
to recreate the
planets of the solar
system

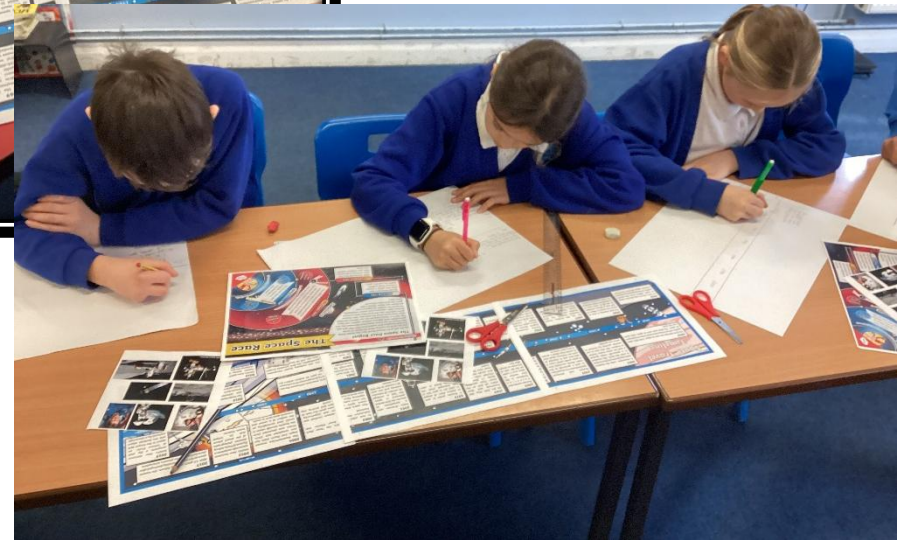

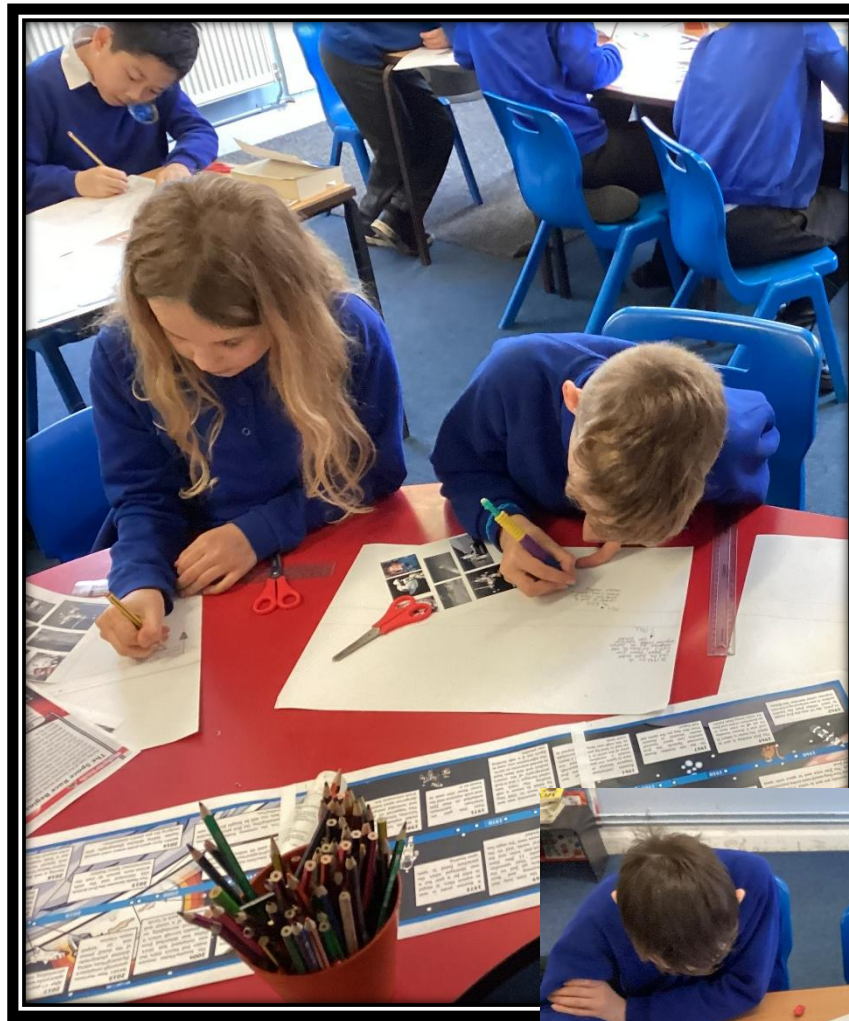

Hedgehogs

Bunnies

As part of our science week, we thoroughly enjoyed showing our knowledge of the planets in our solar system.

We worked hard to create some timelines showing key events in the history of space.

Goats

Year 6 have thoroughly enjoyed British Science Week.

Our highlight has been working as crime scene investigators! We examined light, objects and their shadows to solve a crime.

Chipmunks

We've had lots of fun during Science Week!

One of our tasks was to investigate the lengths of different shadows to solve a crime!

Well done,
everyone!

Together, we
make a great
team!
