

Welcome to
our
celebration
assembly!

17TH OCTOBER
2025

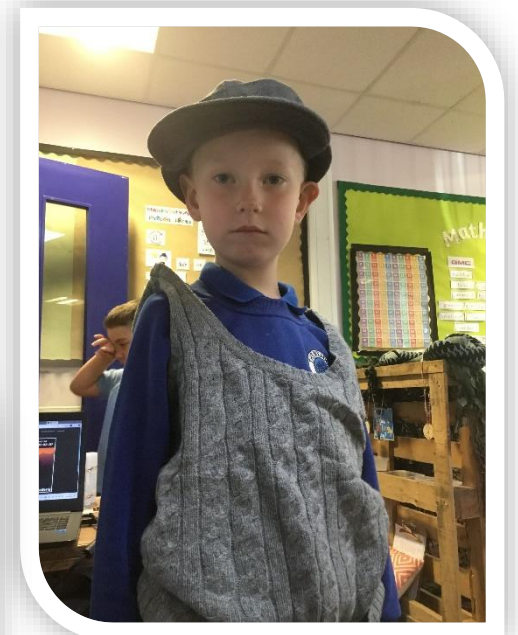

The Dragonflies
have loved
learning more
about
The Victorians
this week.

Don't they look
fabulous in the
Victorian
costumes!

Dragonflies

The Bees have been finding **one less** and **one more** than different numbers. We did it really well!

Bees

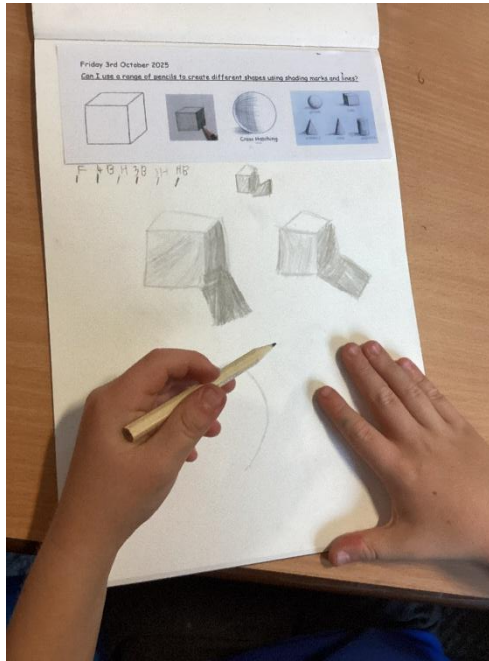

Spiders

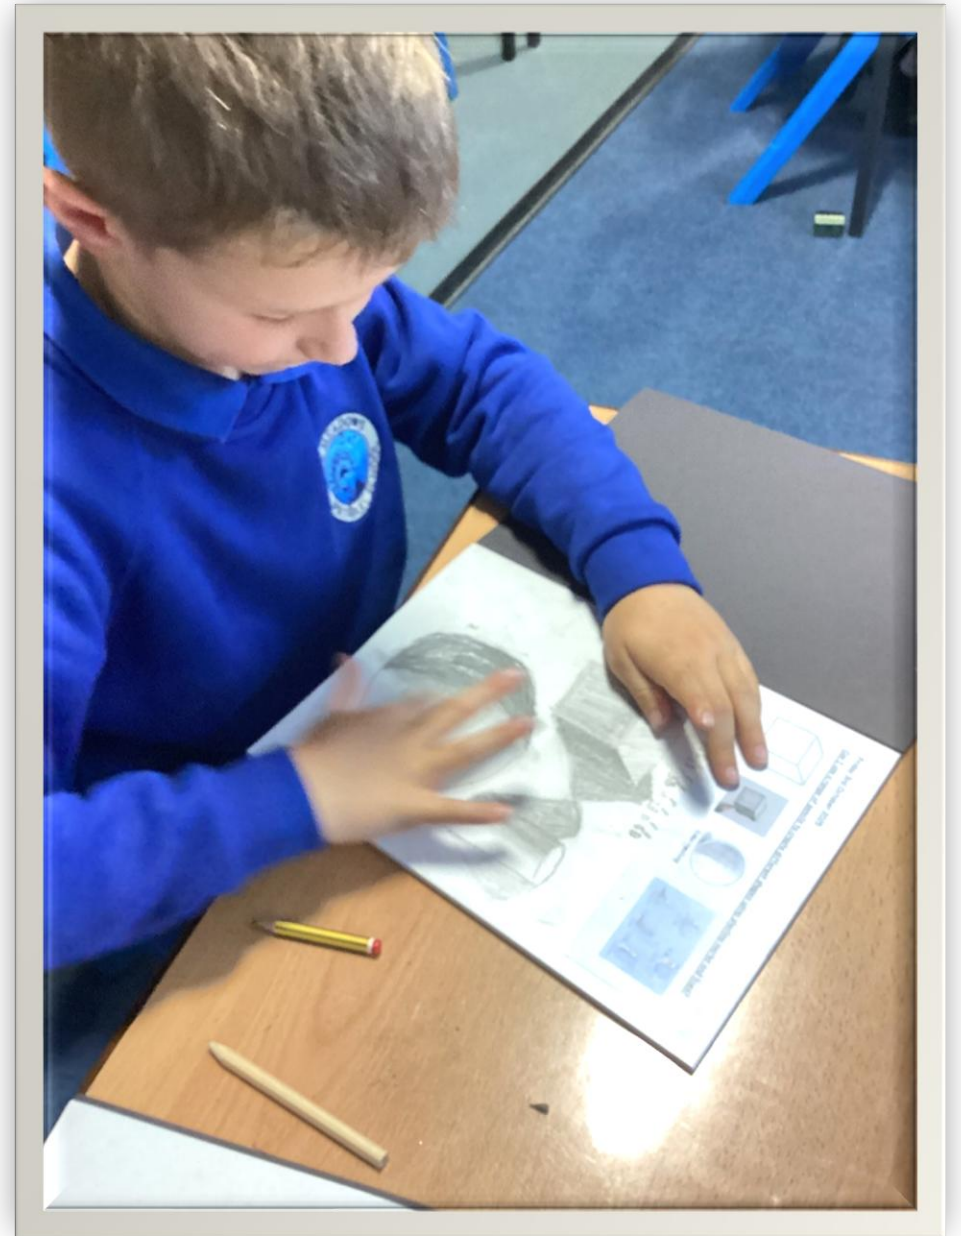

We love working together on our challenges outdoors. It's fun to explore, create and learn outside!

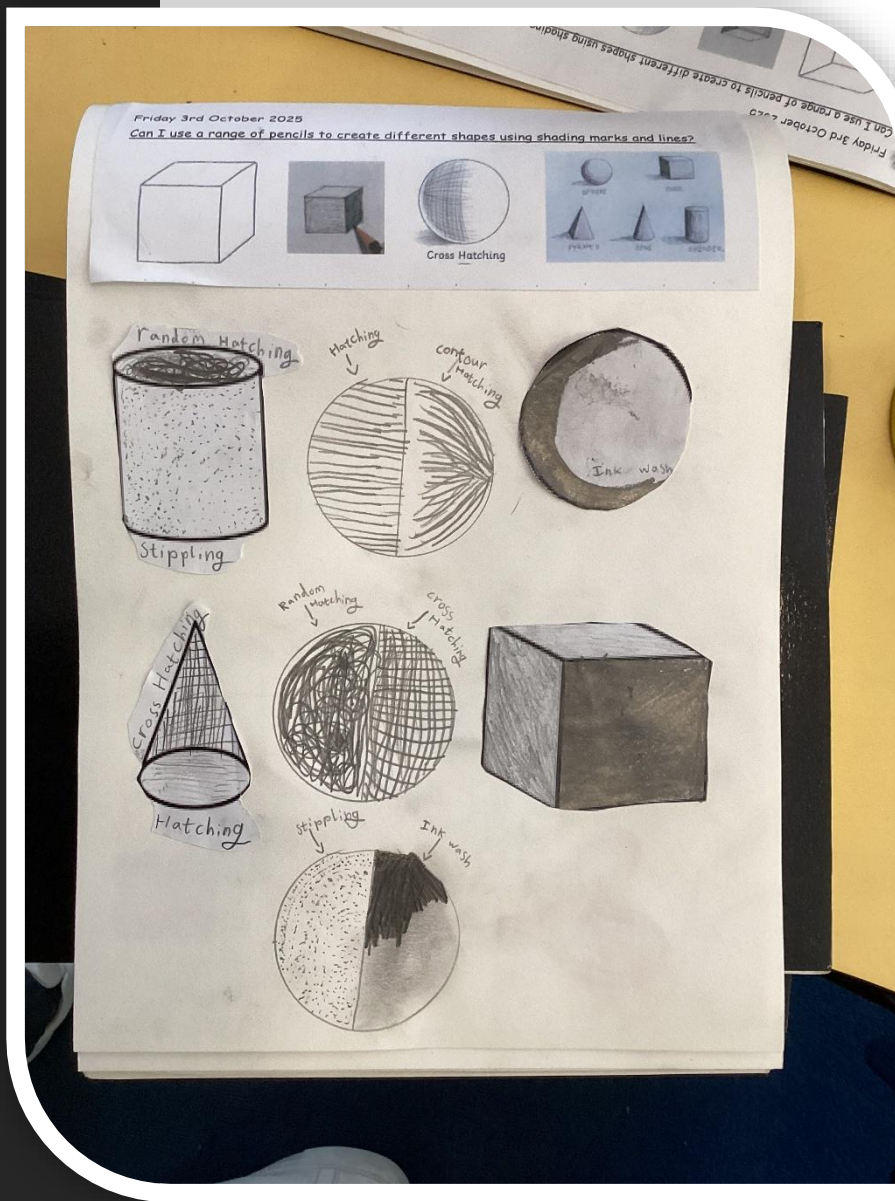

In art we used our sketching skills to draw **3D shapes** and then we shaded them using different techniques.

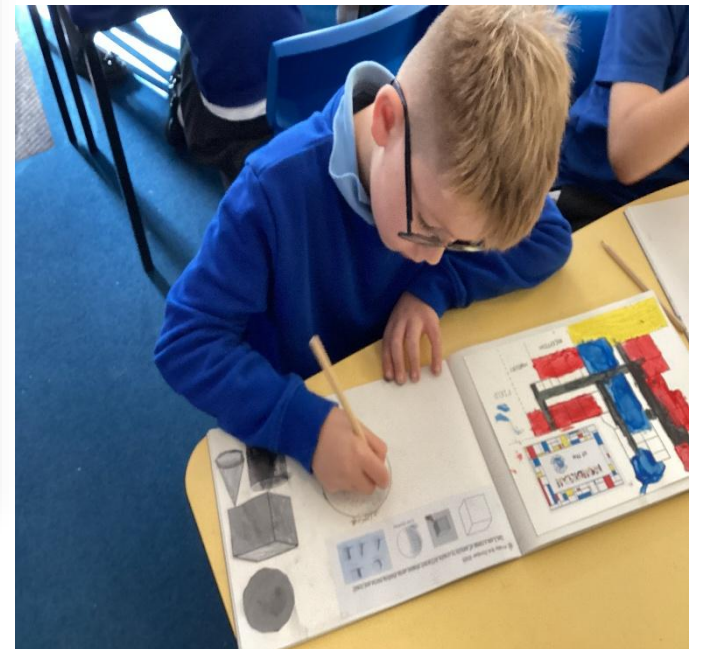

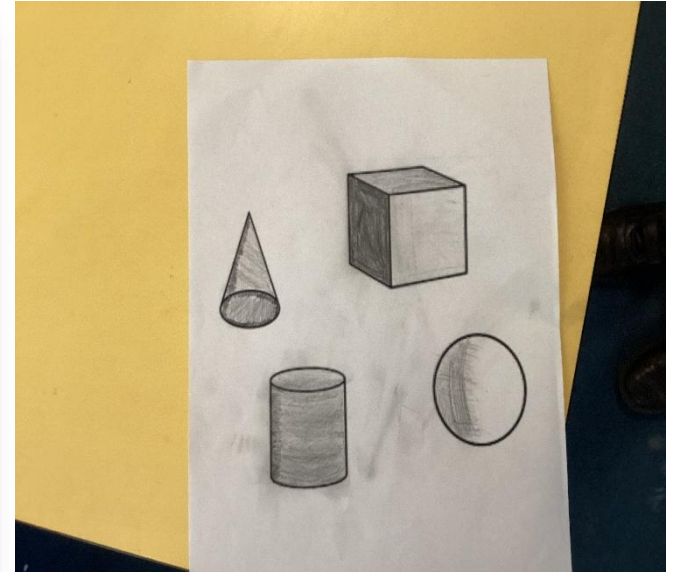

Squirrels

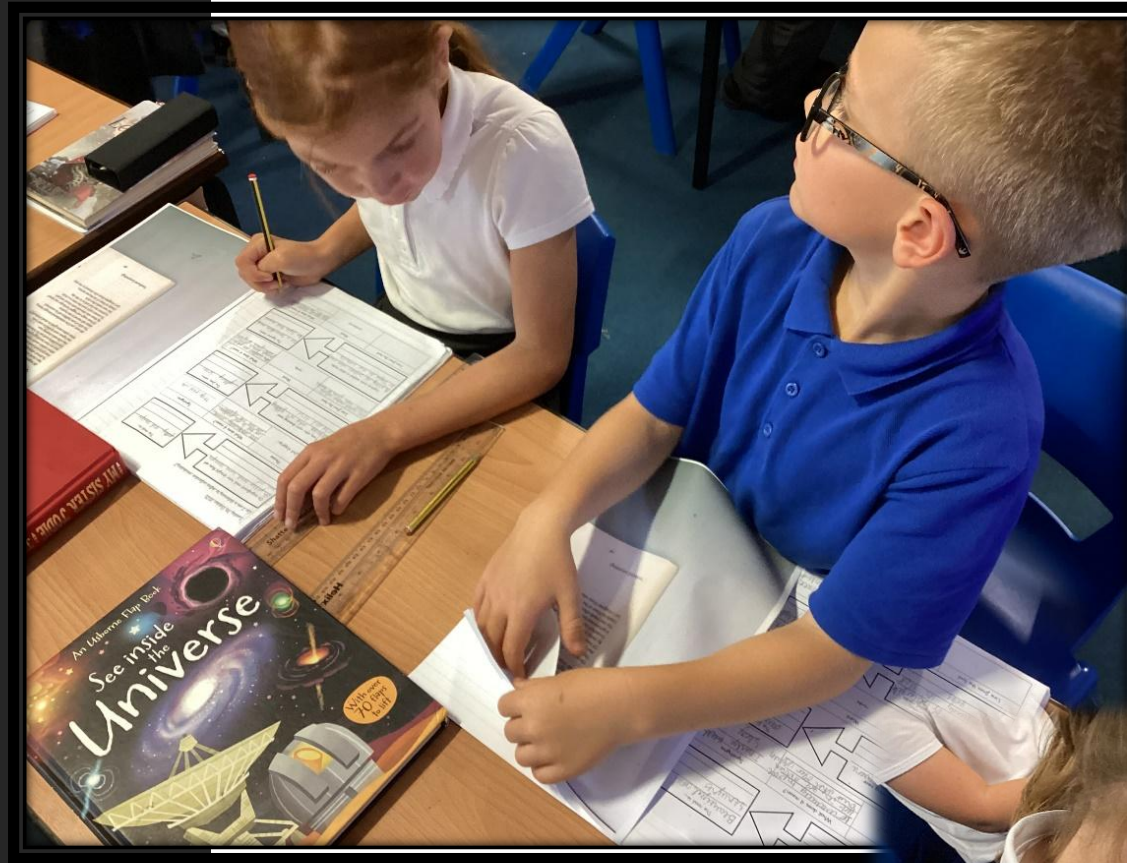

The Hares have enjoyed working on their sketching and shading skills during their art lessons.

Hares

In reading
this week, we
have been
working hard
on decoding
unfamiliar
vocabulary in
our Roman
themed
poem!

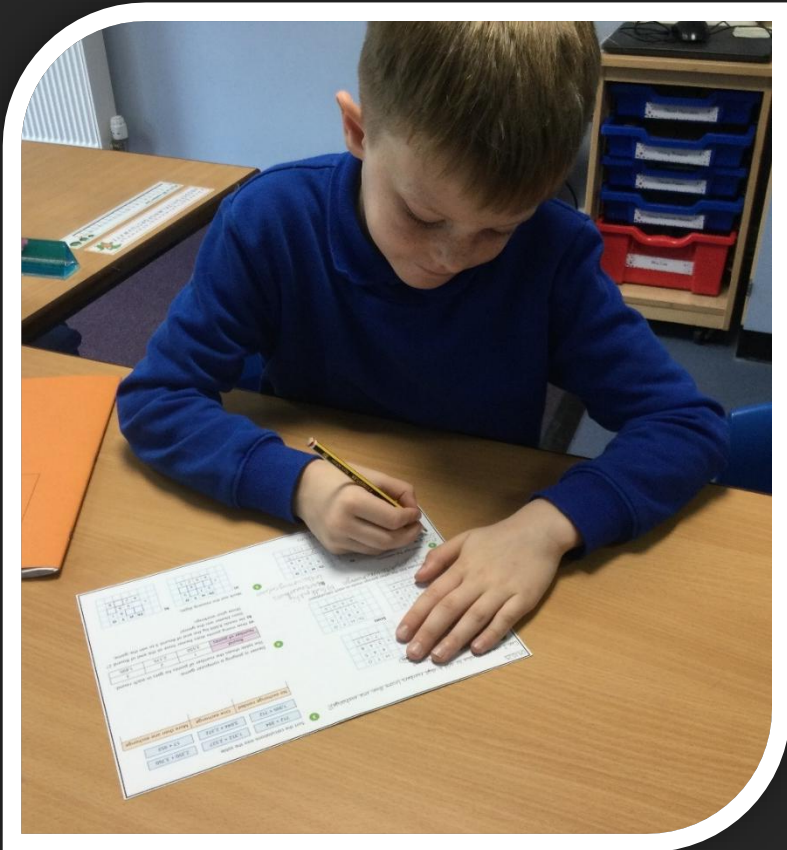

Hedgehogs

This week, Y4 used the **column addition** (with exchanging) to solve word problems.

Meerkats

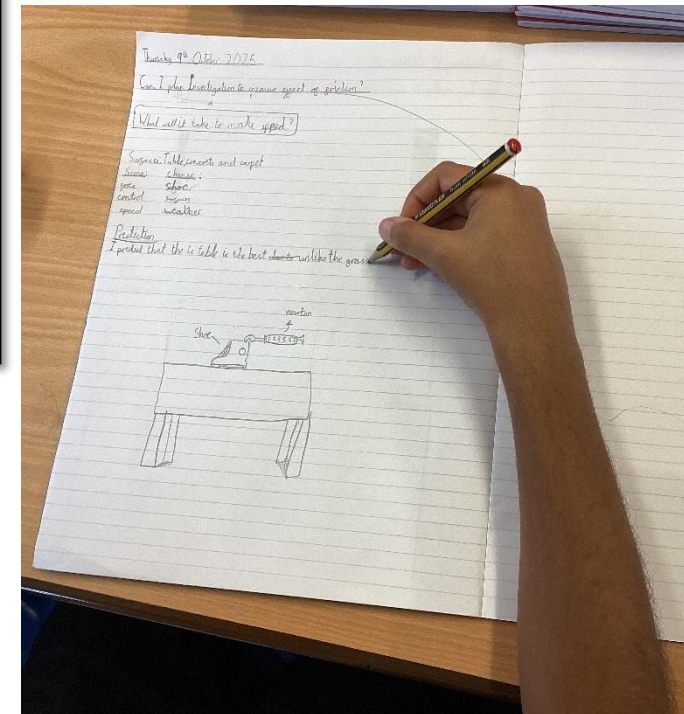

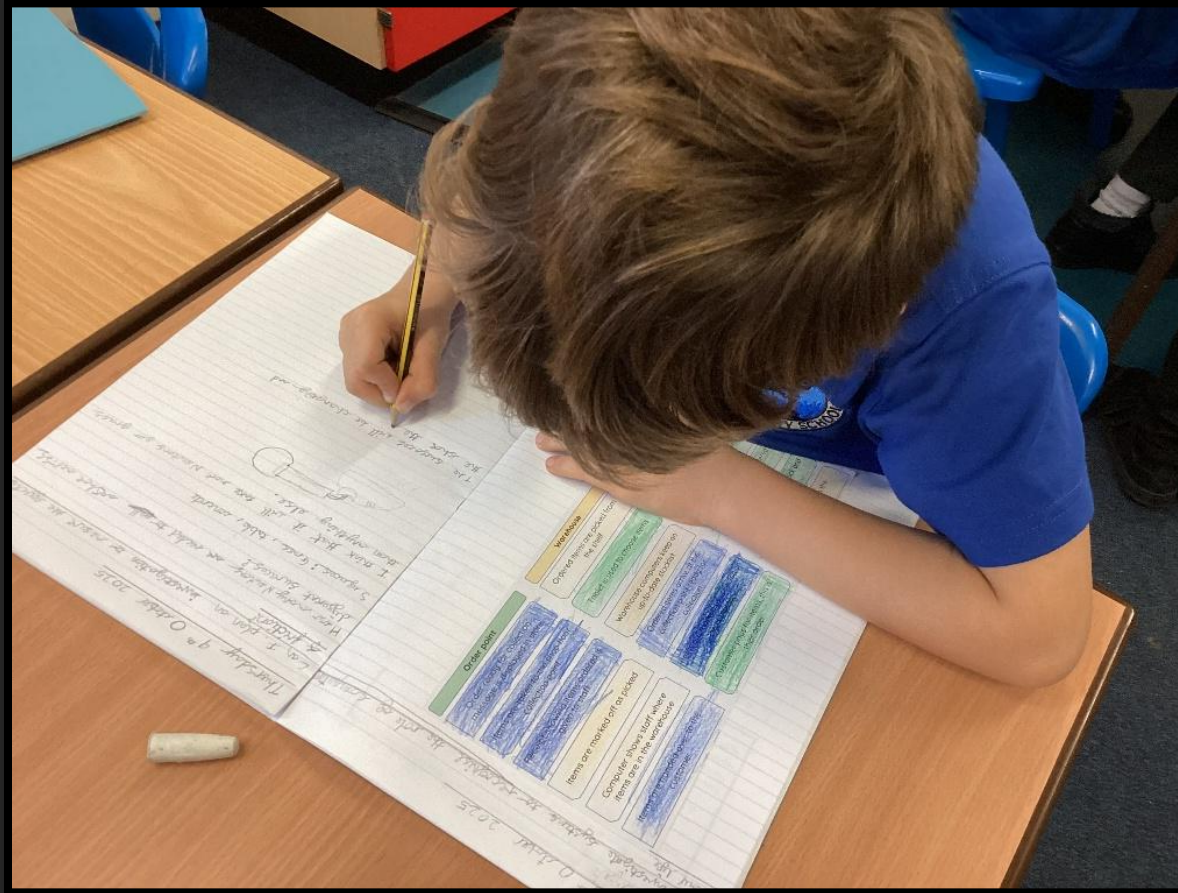

We enjoyed
playing a
game similar
to Monopoly
to practise
writing
complex
sentences.

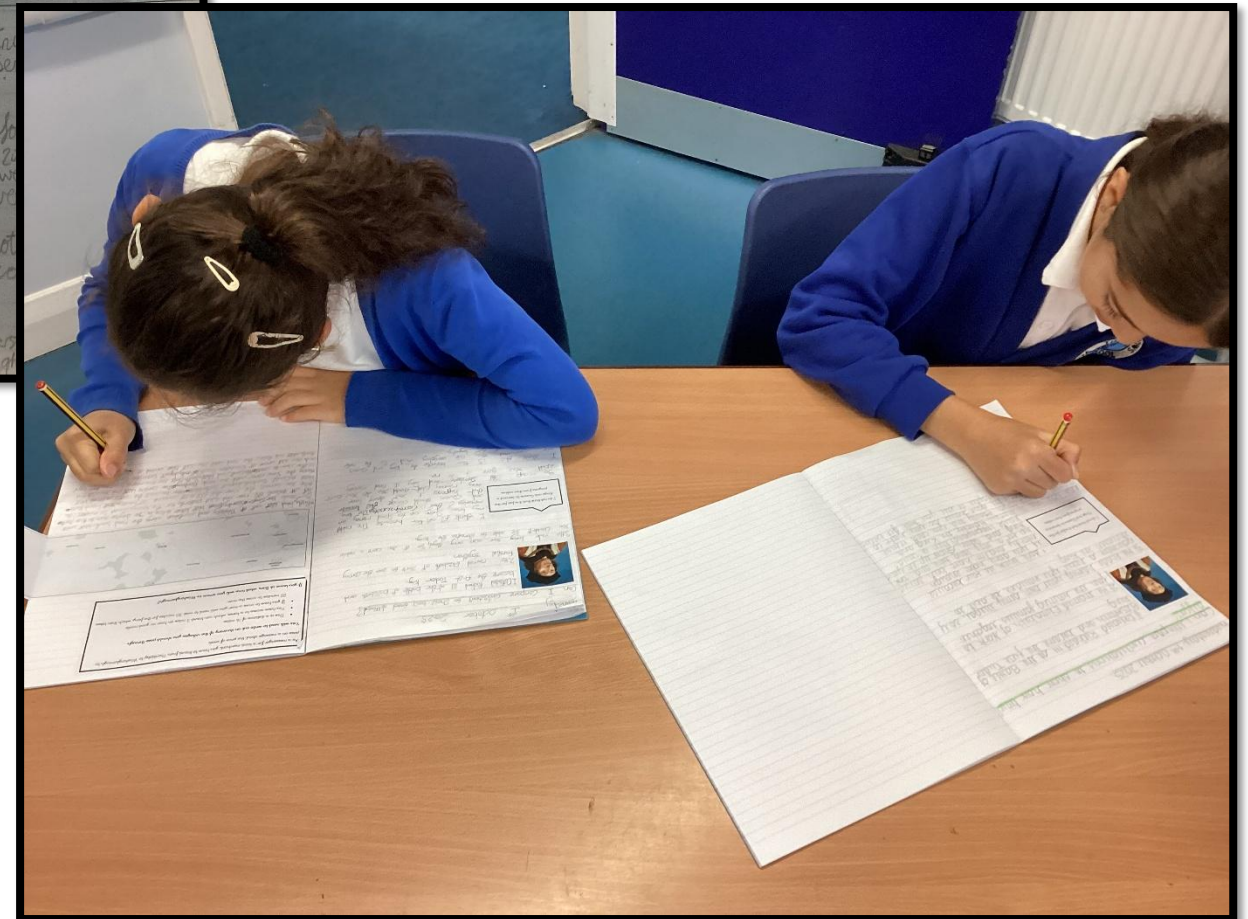

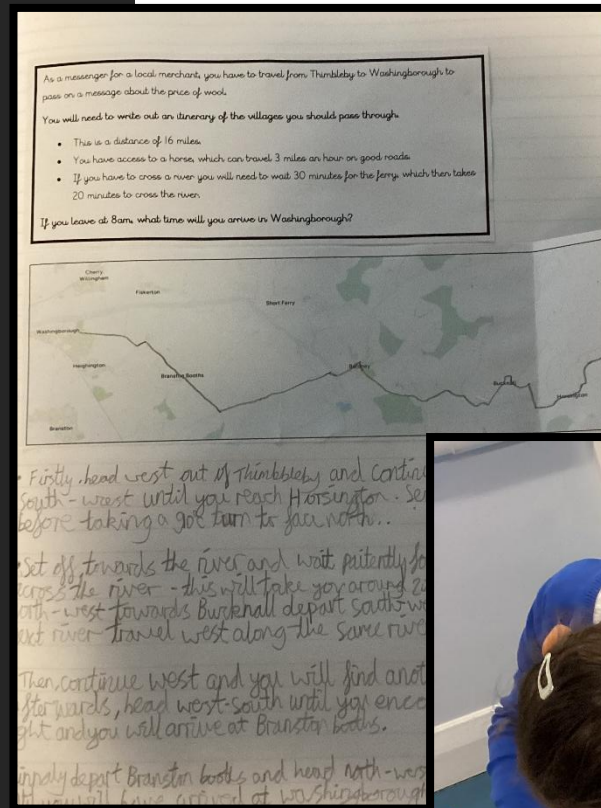

Fawns

In science this week, we were given a question about **friction** and had to create our own experiment to answer the question.

In our history, the
Capybaras have
been **debating** the
fairness of the
Kings and
Queens 'progress'
in Tudor England.

In science,
we've been
focusing on the
life of **Mary
Anning.**

Lemurs

Monday 22nd September 2025

Can I use a timeline to order the important life events of Mary Anning?

DID YOU KNOW?

By the time she was five or six, Mary had her good catching pocketbook ready and took her for good catches. Richard (her dad) taught Mary how to search for and clean the fossils.

Mary found a complete Plesiosaurus.

1799

1811

Mary discovers a complete Ichthyosaurus when she was only 12. (It was 5.2 metres long) (Crested porbeagle)

1824

In 1824 Mary realised that better places were fossilised dinosaur bones.

1826

Mary opened a shop called 'Anning's Fossils'.

1847

Mary only died.

DID YOU KNOW?

Mary was born in the seaside of Lyme Regis, Dorset in 1799. When she was a baby she survived a lightning strike.

Mary's father didn't earn that much in his job as a cabinet maker so he worked the family money by looking for fossil bones in the area.

2022

175 years later a statue of Mary Anning is unveiled in Lyme Regis.

Monday 22nd September 2025

Can I use a timeline to order the important life events of Mary Anning?

EXTRA FACTS!

By the time she was 5 or 6, Mary was her dad's fossil collector!

Mary was very difficult and obstinate in her life and career.

She was from a poor family with no formal education.

Mary opened a shop called 'Anning's Fossils'.

Mary died.

MARY ANNING

1799

1811

Mary discovers a complete Ichthyosaurus when she was 12 years old. This means fish bones!

1824

Mary realised that better places were fossilised dinosaur bones!

1826

Mary discovered a Plesiosaurus.

1847

Mary's dad didn't earn much money in his job as a cabinet maker so he worked the family's earnings.

DID YOU KNOW?

When she was a baby the lady holding her was struck by lightning and Mary Anning was lucky to survive! Phew!

FOSSIL

AMMONITE

Well done,
Team Meadows!

A super week of
learning
together.
