

This week our focus is

Life Cycles

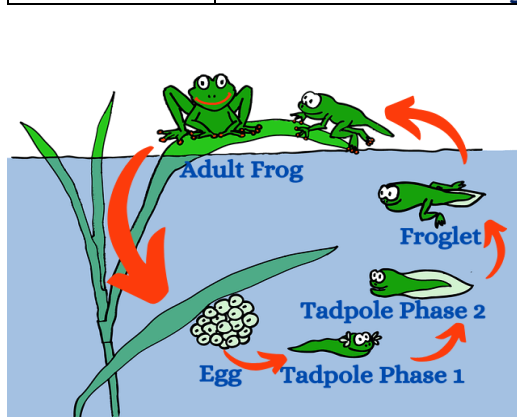

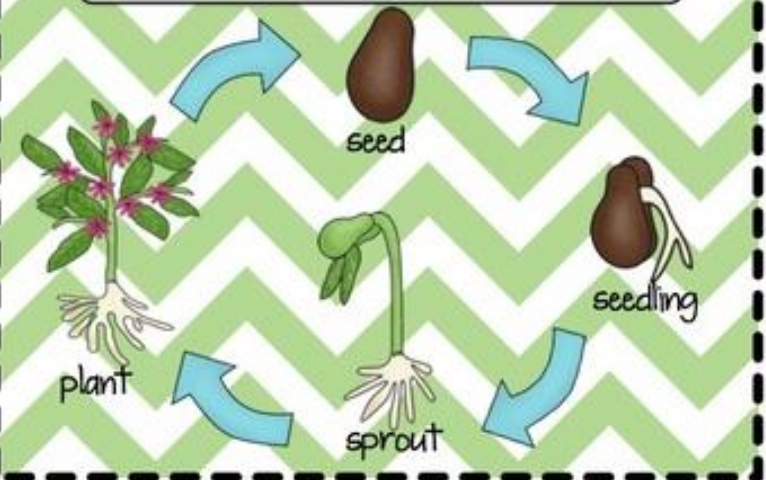

Please use the information below to support your child's learning at home ☺

Key Vocabulary	
life cycle	A life cycle starts when animals are born, or hatch. They grow and get older and bigger. They have babies. The cycle starts again!
growth	Growth is when humans, plants and animals get bigger and stronger. They change and get older.
seeds	A seed is the starting point of a plant. A seed will grow into a plant.
egg	An egg can be laid by hens, or other birds. Other creatures lay eggs too, such as frogs and butterflies. A new baby creature hatches and starts to grow.

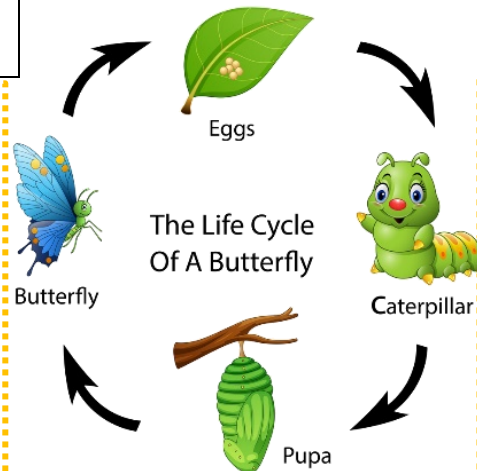

A book we will be sharing:

Life Cycle of a Plant

The life cycles of frogs and butterflies

Key Questions for thinking

- ❖ Can you tell me what happens when we plant seeds?
- ❖ Do you know what we need to do to help seeds grow?
- ❖ Can you name an animal or plant that goes through the life cycle?
- ❖ Do all animals, plants and humans go through the life cycle?
